Welcome to Wilhelm's 4-Week Glute Griller.

Most women train hard but don't feel their glutes, their quads and hamstrings take over. That ends here.

These 4 weeks are your ignition month: you'll build the mind-muscle connection, feel your glutes working, and kickstart your confidence in training.

But remember, this is just the spark.

True glute growth and shaping takes progression over time.

These 4 weeks give you the exact raw blueprint to wake up your glutes.

But if you want to stop guessing your weights and maximize your results, the obvious upgrade is the full 12-Week Peach Era App.

It gives you the specialized progression tools to ensure your effort turns into undeniable, visible progress.

Warm-ups:

Warm-ups are essential, but they shouldn't drain your time or energy. The ideal warm-up? Three sets of 15 reps of your first exercise using no weight.

This is effective because the best way to prepare for a movement—like a squat—is simply by doing that movement. Skip the overly complicated, multi-step routines and save your strength for your actual workout.

Rest:

Rest as long as you need. This means waiting until your muscles feel strong again and your heart isn't racing, not just picking a random time like 30 seconds or 15 minutes.

Don't use a timer! Resting depends on how hard the set was, so wait until you feel ready, then go again. Sometimes this takes 2-3 minutes, other times just 45 seconds. Women usually recover faster. Listen to your body, and rest until you feel good to go!

Schedule:

The “best” way to plan your week, is to leave a day in between the glute days.
For example:

Monday: training day 1

Tuesday: training day 2

Wednesday: training day 3

Thursday: rest

Friday: training day 4

Saturday: training day 5

Sunday: rest

Starting weight:

If you're new to lifting or trying a new exercise and don't know what weight to use, here's a simple way to find it: If your first set calls for 15 reps, choose a weight you can lift 18 times in your first week.

Don't stress if it feels too light—it's always better to start too light than too heavy. You can increase the weight as you get stronger and more comfortable with the movement.

How to progress:

Here's a simple way to figure it out:

Pick a weight you can lift 2 more times than the required reps.

For example, if the set calls for 15 reps, choose a weight you could lift 17 times—but only do 15 reps. This ensures the weight is challenging but not too heavy, helping you build strength safely.

Example:

Squat:

Set 1: 15 reps -> pick a weight you can 17 times

Set 2: 13 reps -> pick a weight you can 15 times

Set 3: 11 reps -> pick a weight you can 13 times

Set 4: 9 reps -> pick a weight you can 11 times

You do this for every exercise, except the ones with the same reps for every set.

You'll grow stronger, especially in the first weeks.

Try increasing the weight every set, and every week.

Weight increase example:

WEEK 1

Squat:

Set 1: 15 reps -> pick a weight you can 17 times -> EXAMPLE WEIGHT: **20kg**

Set 2: 13 reps -> pick a weight you can 15 times -> EXAMPLE WEIGHT: **30kg**

Set 3: 11 reps -> pick a weight you can 13 times -> EXAMPLE WEIGHT: **40kg**

Set 4: 9 reps -> pick a weight you can 11 times -> EXAMPLE WEIGHT: **50kg**

WEEK 2

Squat:

Set 1: 15 reps -> pick a weight you can 17 times -> EXAMPLE WEIGHT: **25kg**

Set 2: 13 reps -> pick a weight you can 15 times -> EXAMPLE WEIGHT: **35kg**

Set 3: 11 reps -> pick a weight you can 13 times -> EXAMPLE WEIGHT: **45kg**

Set 4: 9 reps -> pick a weight you can 11 times -> EXAMPLE WEIGHT: **55kg**

WEEK 3

Squat:

Set 1: 15 reps -> pick a weight you can 17 times -> EXAMPLE WEIGHT: **30kg**

Set 2: 13 reps -> pick a weight you can 15 times -> EXAMPLE WEIGHT: **40kg**

Set 3: 11 reps -> pick a weight you can 13 times -> EXAMPLE WEIGHT: **50kg**

Set 4: 9 reps -> pick a weight you can 11 times -> EXAMPLE WEIGHT: **60kg**

DO NOT DO THIS if you feel like you can't do it. DO NOT hurt yourself just to go heavier!

How to start this training plan

Take it easy!

- If you're a beginner, stick to 2-3 sets max per exercise—don't overdo it.
- Even if you're experienced, ease into the program.
- Always start lighter than you think you need to.

Lifting heavy might look cool, but getting injured is not. Be careful, take your time, and build up gradually!

Jeans-Ripping Glute Activators

These drills won't grow your glutes overnight. But they will teach you to actually feel them, which is the first step to filling out your jeans.

Why you can't feel your glutes

If you've been training for a while but still can't feel your glutes working, you're not broken.

You're just recruiting the wrong muscles.

That means your legs take over every time you squat, lunge, or hip thrust, and your glutes go along for the ride without doing much work.

This happens because of three things:

1. Quad dominance: Your legs are stronger, and your nervous system defaults to them.
2. Wrong recruitment patterns: Learned early and never corrected.
3. Poor mind-muscle connection: You haven't really felt your glute before by really squeezing.

The fix is not a new program or heavier weights.

It's teaching your nervous system to find the muscle before you load it.

That's what this guide does.

The Activation Protocol

You don't have to do all of these. Just pick 1 or 2 and set those cheeks on fire.

Drill 1 - Bodyweight Hip Thrust

Get into the hip thrust position.

It doesn't have to be the perfect setup, but if you're new, it's good to practice it.

Setup:

- Laying weights next to your knees,
- Getting your shoulder blades on the bench
- keeping your upper body straight

Do a normal hip thrust, but squeeze as hard as possible and hold the squeeze **for 3 seconds**.

Do this for 3 sets of 15 reps with no weight.

I feel this in my full glute, but mostly the lower part.

Watch the video here

Drill 2 - Donkey Kickback

On all fours, hands under shoulders, knees under hips.

Keeping your knee bent at 90 degrees, drive one foot up toward the ceiling until your thigh is parallel to the floor.

Squeeze hard at the top and hold for 1 second. Lower slowly, 3 seconds down.

Do this for 3 sets of 15 reps with no weight each side.

I feel this in the lower part of my glute.

Watch the video here

Drill 3 - Frog Pumps

Grab a bench and lie in front of it.

Put your feet on the bench, open your legs as wide as possible, and put the soles of your feet against each other.

Now thrust your hips and squeeze as hard as possible for 3 seconds while keeping your legs open.

Slowly lower down and repeat.

I feel this is my full glute, including the top part, because I keep my legs wide open.

**Watch the
video here**

Drill 4 - Banded Clamshell

Lie on your side with a light resistance band just above your knees.

Feet stacked, hips stacked.

Keeping your feet touching, rotate your top knee upward like a clamshell opening.

Touch your glute med with your top hand; you should feel it working on the outer hip.

I feel this on the side of my glute.

You've even helped the more experienced people like me level up!

Your app literally made me so sore!! But in the best way

The progress is life changing... I was a d1 track athlete and I could never put on weight, and now 3 months retired the progress is ridiculous! I've never felt this good! Thank you so so so much

NO LONGER THE FLAT ASS FRIEND

Used your app for the first time this morning.... Omg I am burning! So happy I've finally found someone who can show me a proper workout routine!

Using your app to make my legs shake since someone's son won't do it 🍑

I am so glad your app finally launched! I just want to say how much I love your app! Your workouts have helped me reach my goals more than any trainer has in the last five years and I've worked with a lot of trainers. The app has a variety of workouts I've never seen, that's probably why I'm actually seeing results! I highly recommend this app to anyone who actually wants to see a change! The best part of the app is that it's you and you make funny comments and it motivates me not have a flat ass ;) This App is a must I give your app ★★★★★ 6 stars if I could!

Hi 💙 I love the app, I finished the first week 2 days ago and I already feel the difference in my whole body, not just my glutes. Anyway after the first 2 days I couldn't walk 😂 It's the first time I've been able to follow a workout on app but with the videos and the rest time it's so easy. Today I start week 2 🥰🥰

Using your app to make my legs shake since someone's son won't do it 🍑

Oh lord!!!! day 2 and my glutes got me waking funny, sore is an understatement 😬 I'am secretly scared of day 3. Wish me luck 🙏

No you're JOKING only on day 3 and the pump is next level already 🔥

I had to take a week off after day 1 knocking me over 😬 I'm officially on day 3 of week 2 & feeling stronger & even seeing slight changes already! Thankyou for finally creating a program that is actually home friendly & not boring!

Just did day two my cheeks feel like they're going to explode 🤪
The split squat nearly took me out!

I've never lost weight and gained muscle before it was the most wild transformation I've ever had from a challenge style workout
