

Wilhelm's 7-Day Glute Griller

By Dr.Glutes 2025

Read Before Starting

Welcome to Wilhelm's 7-Day Glute Griller.

Most women train hard but don't feel their glutes, their quads and hamstrings take over. That ends here.

These 7 days are your ignition week: you'll build the mind-muscle connection, feel your glutes working, and kickstart your confidence in training.

But remember, this is just the spark.

True glute growth and shaping takes progression over time.

That's why the Peach Era Program continues this exact structure for 12 full weeks, so you don't stop after starting.

Warm-ups:

Warm-ups are essential, but they shouldn't drain your time or energy. The ideal warm-up? 3 sets of 15 reps of your first exercise using no weight.

I also like to use the hip thrust for warm-up for glute days. That way, you already have 3 sets of squeezing in the glutes, and this can help some women feel their glutes better.

Rest:

Rest as long as you need. This means waiting until your muscles feel strong again and your heart isn't racing, not just picking a random time like 30 seconds.

Resting depends on how hard the set was, so wait until you feel ready, then go again. Sometimes this takes 2–3 minutes, other times just 45 seconds. Listen to your body, and rest until you feel good to go!

Starting weight:

If you're new to lifting or trying a new exercise and don't know what weight to use, here's a simple way to find it: If your first set calls for 15 reps, choose a weight you can lift 18 times.

Don't stress if it feels too light, it's always better to start too light than too heavy. You can increase the weight as you get stronger and more comfortable with the movement.

How to start this training plan

- If you're a beginner, stick to 2–3 sets max per exercise, don't overdo it.
- Even if you're experienced, ease into the workout. New things can make you feel sore.
- Always start lighter than you think you need to.

Single Leg Exercises

When it comes to single leg exercises, make sure to rest 30–60 seconds between legs. Look at them as 1 set. They don't count as 1 set (a set per leg = 1 set), but don't immediately switch legs after 1 is done, rest a little, then go again.
